DATABRICKS ADVANCED QUICK START PACKAGE

To accelerate Databricks adoption, Abylon offers fixed-scope Quick Start packages at three tiers. Each tier is designed for a specific maturity level, with clearly defined deliverables and rapid outcomes. This structured approach minimizes risk and upfront investment while demonstrating quick ROI.

- **Package:** Databricks Advanced Quick Start
- **Investment:** £50,000
- **Duration:** 8–12 weeks
- **Ideal for:** Data & analytics teams deploying Databricks across business units with multiple data sources and reporting needs.

ELEMENT	EFFORT	DETAILS
Assessment & Design	5–10 days	Design architecture, align to business goals
Infrastructure Setup	5–10 days	Cloud workspace setup, Unity Catalog basic config
Data Ingestion	3-5 sources (max 30 pipelines), 5-7 days	Batch and light streaming pipelines
Data Storage	30-50 Delta tables, 5-7 days	Partitioned, documented, query-ready
Datamart	1 Datamart (max 10 views), 15-20 days	Curated model for reporting
Training	2 x 2-4 hour sessions, 1–2 days	Extended training for engineers and analysts
Documentation	5–10 days	Pipeline catalogue, architecture guide, runbooks
Support	4–6 days	Ongoing support over 6 weeks
Self-Service BI	1 dashboard (max 3 pages), 3-5 days	Integration with Power BI, Tableau, or Qlik
Data Governance	2–3 days	Unity Catalog setup, RBAC, tagging

WHY CHOOSE THIS PACKAGE?

- Build real pipelines and dashboards with multiple data sources.
- Set up governed self-service analytics with your BI tools.
- Expand your team's capability and prepare to scale usage.

OUTCOMES YOU CAN EXPECT

✓ **A functional, secure lakehouse with multiple data domains.**

✓ **Dashboards and self-service reporting for business teams.**

✓ **Teams enabled to build and own new use cases.**

✓ **Foundation for scaling to advanced analytics or AI.**

OPTIONAL ADD-ON MODULES

- Streaming Analytics Setup
- DevOps Acceleration
- ML & Data Science Enablement
- BI Semantic Layer & Metric Standardization
