

# DATABRICKS ENTERPRISE QUICK START PACKAGE

To accelerate Databricks adoption, Abylon offers fixed-scope Quick Start packages at three tiers. Each tier is designed for a specific maturity level, with clearly defined deliverables and rapid outcomes. This structured approach minimizes risk and upfront investment while demonstrating quick ROI.

- **Investment:** £80,000-120,000
- **Duration:** 3–6 months
- **Ideal for:** Large organizations launching Databricks as a strategic platform across departments.

ELEMENT	EFFORT	DETAILS
Assessment & Design	10–12 days	Strategic architecture, roadmap, cross-dept planning
Infrastructure Setup	10–15 days	Multiple environments, infra as code, advanced network config
Data Ingestion	5–10 sources, 10 days	Streaming and batch data
Data Storage	100+ Delta tables, 10 days	Optimized for scale, cost, and performance
Datamart	3 datamarts (20 views each), 3 x 20 days	Multi-department curated access models
Training	Bespoke training program, 2-3 days	Enablement across engineers, analysts, execs
Documentation	5–10 days	Full operational runbooks, handover materials
Support	10 days	Hypercare support during platform go-live: 8-12 weeks
Self-Service BI	5 dashboards (max 5 pages each)	Governed reports for business consumption
Data Governance	15–20 days	Lineage, RBAC, Unity Catalog + integrations
ML & Data Science	20–30 days	End-to-end model development and deployment
Monitoring & Ops	10 days	Usage dashboards, cost monitoring

## WHY CHOOSE THIS PACKAGE?

- Deploy multi-domain lakehouse architecture for strategic data needs.
- Enable multiple workstreams: BI, ML, real-time streaming.
- Establish a foundation for long-term platform scale and governance.

## OUTCOMES YOU CAN EXPECT

- ✓ **Secure, scalable Databricks platform ready for enterprise workloads.**
- ✓ **Live business use cases across BI, ML and real-time analytics.**
- ✓ **Upskilled internal teams with operational readiness.**
- ✓ **Long-term data strategy unlocked.**

## OPTIONAL ADD-ON MODULES

- Advanced Cost Governance
- ML Ops & Model Registry
- Data Mesh Enablement
- Streaming Telemetry / IoT Pipelines

## ABOUT ABYLON

Abylon is a data and AI consultancy specializing in enterprise-grade Databricks implementations across Europe and the UK. As a certified Databricks partner, we help organizations rapidly modernize their data architecture and accelerate time-to-value on the Lakehouse platform.

We've delivered successful Databricks projects with leading enterprises such as Diageo—supporting cloud migration and analytics unification—and OTP Bank, where we enabled secure, governed access to real-time financial data.

Founded by ex-Microsoft professionals, our team blends strong engineering skills with commercial insight to deliver measurable outcomes. Whether you're new to Databricks or scaling it company-wide, Abylon has the expertise to ensure your success.
